XTONE

Synergy between evolution and design, the sintered mineral compact XTONE offers high performance surfaces to adapt to any surface or volume.

10-Years warranty

Ensuring the quality of XTONE, rigorous tests are carried out that ensure its suitability for kitchen countertops and therefore offers a 10-year product warranty.

Scratch and impact resistant

Extremely resistant to scratching with cutting utensils when taking minimum precautions. Capable of absorbing the energy from impacts and loads, maintaining its integrity.

High resistance to chemical attacks

Unalterable to household chemicals and high resistance to any type of stains.

Mechanical resistance

In a thickness of just 12 mm, it offers greater mechanical strength than other natural or compact surfaces.

Abrasion resistant

It features great resistance to wear and tear, unalterable over time.

Waterproof

The non-porosity of the sintered compact prevents the absorption of liquids and gases.

Resistant to high temperatures

Certified a1 and a2, it withstands direct contact with kitchen utensils at high temperatures. Fireproof and incombustible, it does not alter its aesthetics or performance.

Unalterable to UV rays

UV-resistant, it ensures unparalleled durability thanks to its surface stability.

Sustainable buildings

XTONE products count positively in awarding points for LEED and BREEAM certificates.

Hygienic

NFS certified, XTONE sheets do not allow the proliferation of bacteria, presenting 0 volatile organic compounds. Obtaining the A+ certification.

Easy to clean

Easy daily maintenance without the need for special products.

Resistant to ice and frost

Stable to sudden changes in temperature, it can withstand the most extreme cold conditions, being suitable for both indoor and outdoor use.

100% natural and recyclable

High-quality natural minerals are sintered in a new homogeneous compound that can be completely regenerated after its life cycle. XTONE can include up to 40% recycled material.

MATERIALS COMPARISON TABLE

AVAILABLE FINISHES

SILK

A satin and silky finish, which creates a unique feel to the touch due to its beauty and finesse.

NATURE

A unique touch due to its beauty and fineness. Soft matte surface that provides warmth in a simple and elegant way.

POLISHED

An unparalleled and highly reflective shine, which also has saturation power.

EDGE FINISHES

The XTONE plate lets us carry out numerous edge finishes, whether with the automatic edge polishing machine and appropriate tools or manually.

Chamfered edge

Double chamfered edge

Straight shark nose

Round chamfered edge

Double round chamfer

Rounded Shark Nose

Built-up pencil edge

Built-up straight chamfer

Demi-bullnose

INVISIBLE JOINT

Thanks to the latest generation technology, XTONE achieves accurate finishes in the transformation of the material/product. The invisible joint system makes it possible to join two or more sections of the worktop in an imperceptible way: a solution that reduces surface joints to a negligible amount. Ask your authorized XTONE transformer.

Without invisible joint
