Introduction

This 100% Waterproof Construction Board (WPC) provides an ideal solution where water ingress has always been a problem—no more swelling and replacement of carcasses.

This environmentally friendly board is also resistant to extreme weather, chemicals and termites. It is a low maintenance “green” product that will not rot, crack or warp, making it the obvious choice for any domestic, commercial or infrastructural environments.

Revolutionise the look and feel of outdoor spaces with extended life spans of your WPC constructed furniture or design elements.

Features

- WPC is 100% waterproof
- Formaldehyde and Lead free
- Lightweight with excellent structural strength and known for high load bearing strength.
- Superior screw holding capability and machinability with standard board processing machines like board saws, beam saws, vacuum press, CNC router, edge banders, multi boring and other machines.
- Carpenter friendly—can be easily cut, drilled, nailed, painted, moulded, embossed, deep routed, profile edged, printed and welded in accordance with PVC bonding materials and sanded like normal wood based products.
- Sound insulation, sound absorption, heat insulation and heat preservation.
- Completely safe against any wood destroying organisms and insects.
- Highly stable panel, no chance of cracking or bending in application.
- Suitable for a myriad of interior and exterior applications and uses.

Engineered product for multiple uses

INTERIOR APPLICATION

- Cabinets & Panels
- Wall Panelling
- Wardrobes
- Partitions
- Home & Office Furniture
- Ceiling Solutions
- Industrial Sections

EXTERIOR APPLICATION

- Exterior Wall Cladding
- Flooring
